Santa Clara, CA - Multibeam Corporation selected as a Red Herring Top 100 North America Tech Startup

Red Herring announced that it has selected Multibeam Corporation as a Winner of the Top 100 North America award, a prestigious list honoring the year's most promising private technology ventures from the North American business region.

"After rigorous contemplation and discussion, we narrowed our list down from hundreds of candidates from across North America to the Top 100 Winners. We believe Multibeam Corporation embodies the vision, drive and innovation that define a successful entrepreneurial venture," said Alex Vieux, publisher and CEO of Red Herring.

The Red Herring editorial team selected the most innovative companies from a pool of hundreds from across North America. The nominees are evaluated on both quantitative and qualitative criteria, such as their technological innovation, management strength, market size, strategic execution, and integration into their respective industries.

Red Herring's Top 100 North America list has become a mark of distinction for identifying promising new companies and entrepreneurs. Red Herring editors were among the first to recognize that companies such as Facebook, Google, Yahoo, Skype, and eBay would change the way we live and work.

This unique assessment of potential is complemented by a review of the track record and standing of a company, which allows Red Herring to discover and advocate the greatest business opportunities in the industry.

About Multibeam Corporation

Multibeam is the technology leader in high-speed multiple-column E-Beam Lithography (EBL). In 2011, Multibeam introduced Complementary EBL (CEBL). CEBL extends Optical Lithography and enables the production of next-generation semiconductors in high volumes at reduced cost. Multibeam is led by Dr. David K. Lam.
